Art Unit: 3673

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 15 and 16, drawn to reinforced formed part.

Group II, claim(s) 17, drawn to method of forming a reinforced form part.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: claims 15 and 16 directed to a reinforced form part are directed to the particular materials and shape of the formed part whereas claim 17 directed to a method of forming a reinforced formed part are directed to forming the external part and foaming a "prepeg" body while within the external part.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows: There are three Groups of species. *Applicant must elect a single species from each of the three groups of species.*

Group I: Fig. 3;

Fig. 4;

Art Unit: 3673

Fig. 5;

Fig. 6.

Group II: steel external part;

aluminum external part;

zinc external part;

magnesium external part

titanium external part

alloy external part

Group III: steel foam filling

aluminum foam filling

alloy foam filling

Applicant is required, in response to this action, to elect a single species *from within each Group of species* to which the claims shall be restricted if no generic claim is finally held to be allowable. The response must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3673

4. The claims are deemed to correspond to the species listed above in the following manner:

Group I:

Claim 16---Fig. 3

Claim 16---Fig. 4

Claim 16---Fig. 5

Claims 15 and 16---Fig. 6

Group II:

Claims 15-17---steel external part

Claims 15-17---aluminum external part

Claims 15-17---zinc external part

Claims 15-17---magnesium external part

Claims 15-17---titanium external part

Claims 15-17---alloy external part

Group III:

Claims 15-17---steel foam filling

Claims 15-17---aluminum foam filling

Claims 15-17---alloy foam filling

The following claim(s) are generic: claim 16 and claim 17.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special

Art Unit: 3673

technical features for the following reasons: the shape and material of the respective species outlined above are each mutually exclusive one from another.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Safavi whose telephone number is (703) 308-2168.
